Ebru Timinci

Product Designer · UX research · prototypes in code

Ljubljana, Slovenia, moving to İzmir, Turkey · open to relocating to London · ebru.timinci@gmail.com · +386 69 304 948

Portfolio: ebrutiminci.vercel.app · linkedin.com/in/ebru-timinci · github.com/ebrutiminci

Summary

Product designer with an architecture background and a minor in psychology. I research how people experience spaces and products, turn what I learn into end-to-end flows in Figma, and build working prototypes in HTML, CSS and JavaScript. I've shipped live web apps, run a 31-person experience-sampling study, and built internal AI tools in my current role. I've been a Revolut customer since 2022.

Projects

Revolut outage: designing for the worst day · case study, 2026 · ebrutiminci.vercel.app/casestudy.html

- Analysed 22 public reports of the 20 October 2026 outage and mapped where customers were left without information in the app.
- Designed an in-app outage mode: a status banner, a "last synced" line on the balance, a lock-screen push and saved support messages. Sketched in Procreate, then built hi-fi screens and reusable components in Figma.

UX Research App · web app, designed and coded, 2026 · live

- A tool that helps founders turn an idea into hypotheses, interview guides and surveys, with live checks that flag leading, future and yes/no questions.
- Designed the flow, wrote the product spec, and built it in plain JavaScript, deployed on Vercel.
- Used it to run a dating app survey (12 answers) and turned the results into ranked P0/P1 insights.

"Feeling at Home in the City" · mobile research app, master's thesis, 2025

- Designed an experience-sampling app for Ljubljana: two one-time surveys, then short check-ins tagged with location, with a streak and a "virtual city" that grows as people take part.
- Collected 98 responses from 31 people and turned them into emotional maps of the city.

Bus widget · Android home-screen widget, designed and built, 2026

- A widget that shows the next LPP bus times in Ljubljana right on the phone's home screen, marking timetable times apart from live GPS times.
- Wrote a 10-question survey to test whether the design explains itself and whether other riders would install it.

Experience

Architect · Atelje Ostan Pavlin, Ljubljana · Jan 2026 – present

- Designed and built internal AI tools for the studio: agents that model in SketchUp and draw in AutoCAD, and a SketchUp extension that exports plans and sections to DXF.
- Wrote the standards that keep AI-made drawings consistent with office conventions, so the whole team gets the same output.
- Redesigned the studio's website.

Junior Architect · Studio Archaico · Nov 2024 – Feb 2025

- Led the studio's website redesign in Italian and English: restructured the information architecture and wrote colour and text guidelines. SEO score went up 30 points, and monthly visitors grew 50%.

UX Consultant · B2Breach · Jan 2024 – Sep 2024

- Designed pitch decks and customer communication materials.

UX Consultant · Coinquilino · Jul 2023 – Dec 2025

- Consulted on the product's user flows and customer satisfaction KPIs.

Freelance brand designer · Jan 2022 – present

- Logos and visual identities for small businesses.

Education

M.Sc. Sustainable Architecture and Landscape Design · Politecnico di Milano · 2022 – 2025

- Final grade 110/110. Thesis "Feeling at Home in the City": user research on how people experience Ljubljana's public spaces.
- Erasmus+ in Ljubljana and Pamplona.

B.Arch. · TED University, Ankara · 2018 – 2022

- GPA 3.86/4.00, honour student for 8 semesters. Minor in Psychology, GPA 4.00/4.00.

Certificates

- Google UX Design Professional Certificate
- CalArts UI/UX Design Specialization

Skills

- **Research:** surveys, interviews, experience sampling, usability testing, affinity mapping, insights ranked by priority
- **Product design:** user journeys and flows, information architecture, wireframes, interaction design, prototyping, product specs, success metrics
- **Visual design:** typography, grids, layout, colour, branding
- **Tools:** Figma, Framer, Adobe Photoshop, Illustrator, InDesign, After Effects, Procreate, QGIS, Excel
- **Code:** HTML, CSS, JavaScript, Git and GitHub, Vercel, Claude Code, SketchUp Ruby API
